Downloading, Installing and Enrolling your Application

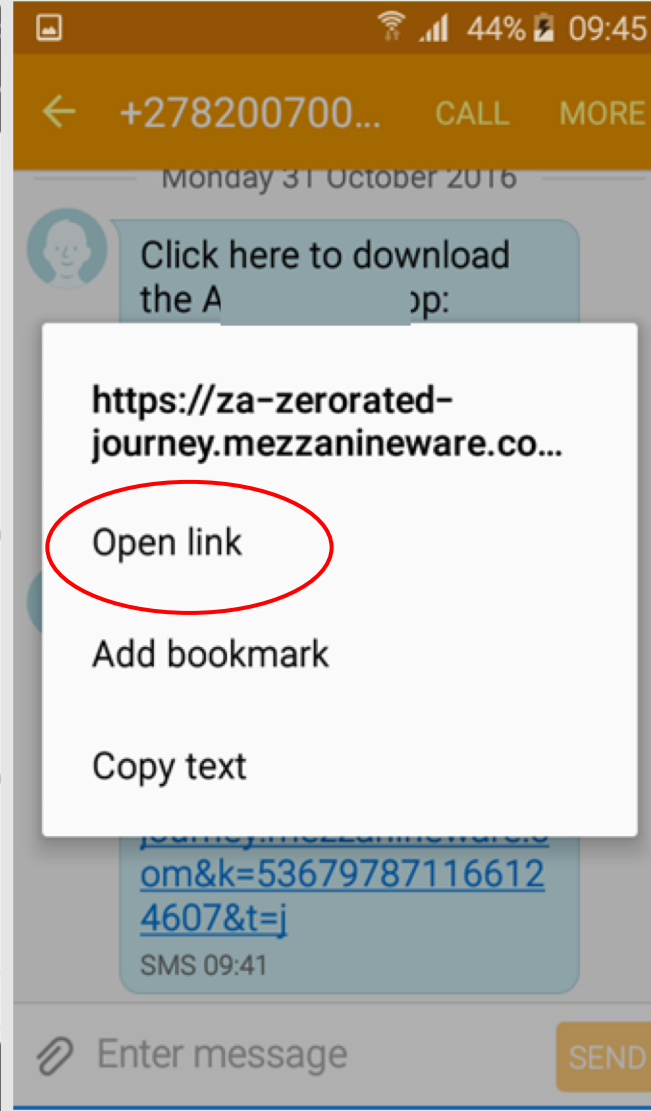

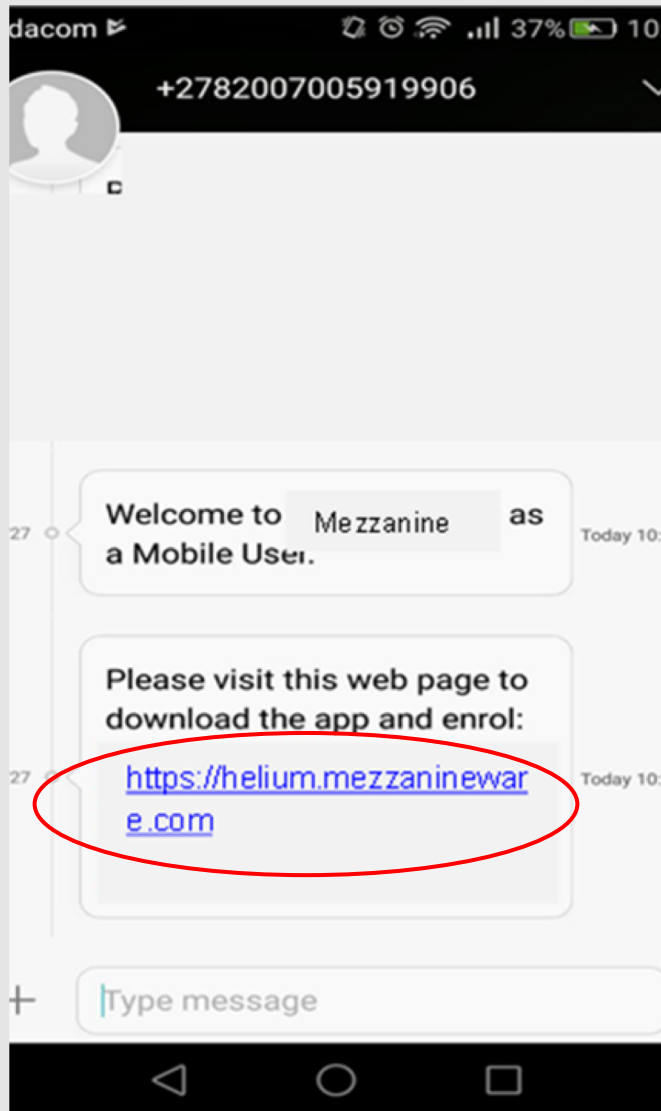

1

Via SMS links

A request to receive the Installation and enrolling links should be logged with your First line support (your immediate Leader/Supervisor)

2

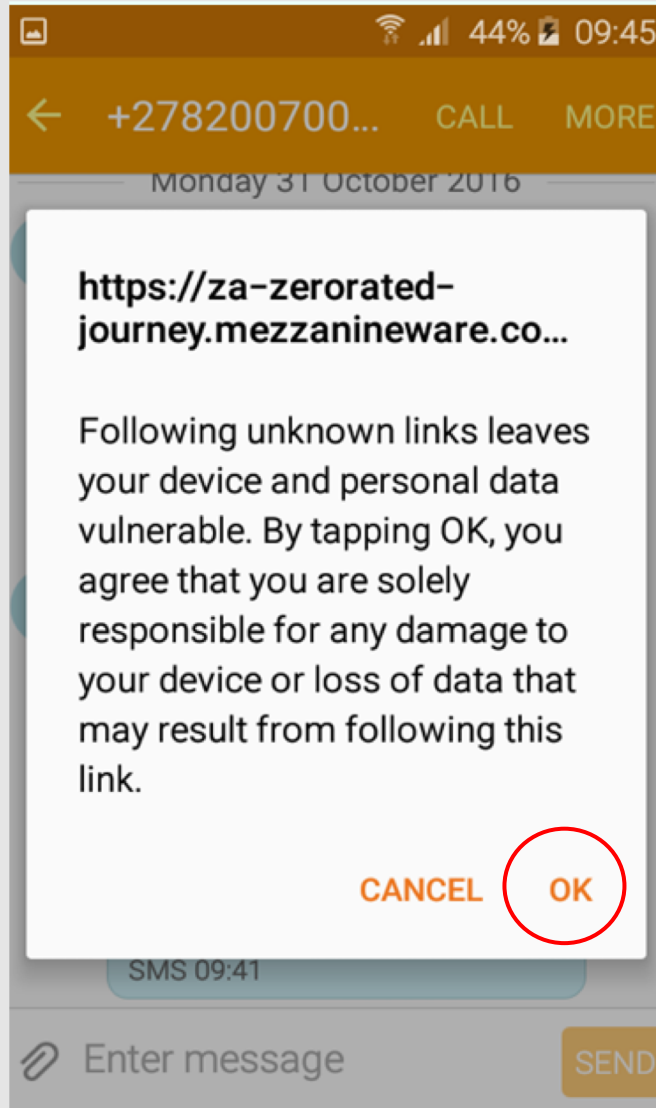

Receiving your sms link on your mobile device

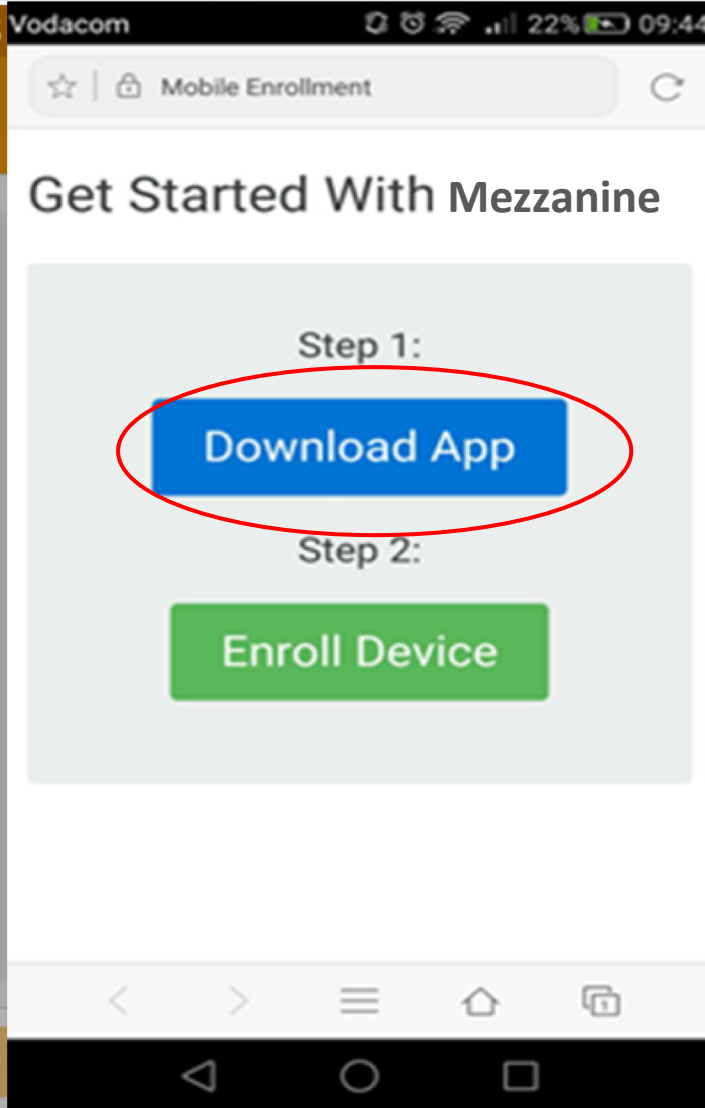

1. Locate the sms in your message Inbox and click on the link **Highlighted blue/green**
2. Click on **Open link** on the pop up message
3. Choose Internet and make sure you click on **Just once** and not always. If you did not get this option to choose it means you already set an default for this instruction but may continue with next steps.

3

Installing the Device and Enrolling for the first time

Screenshot 1

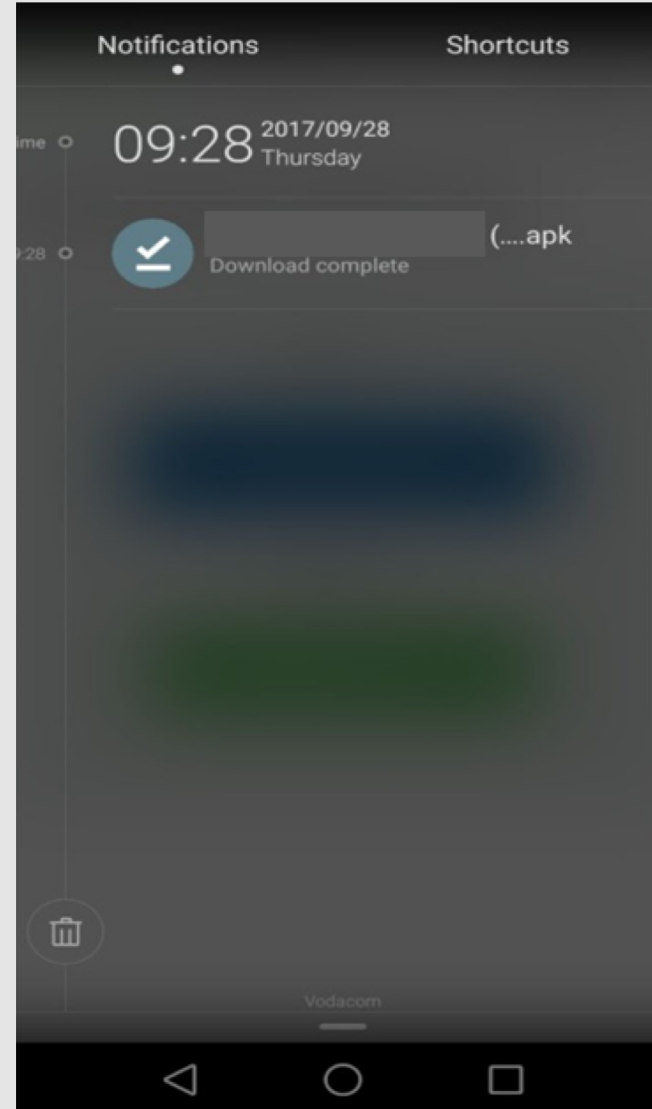

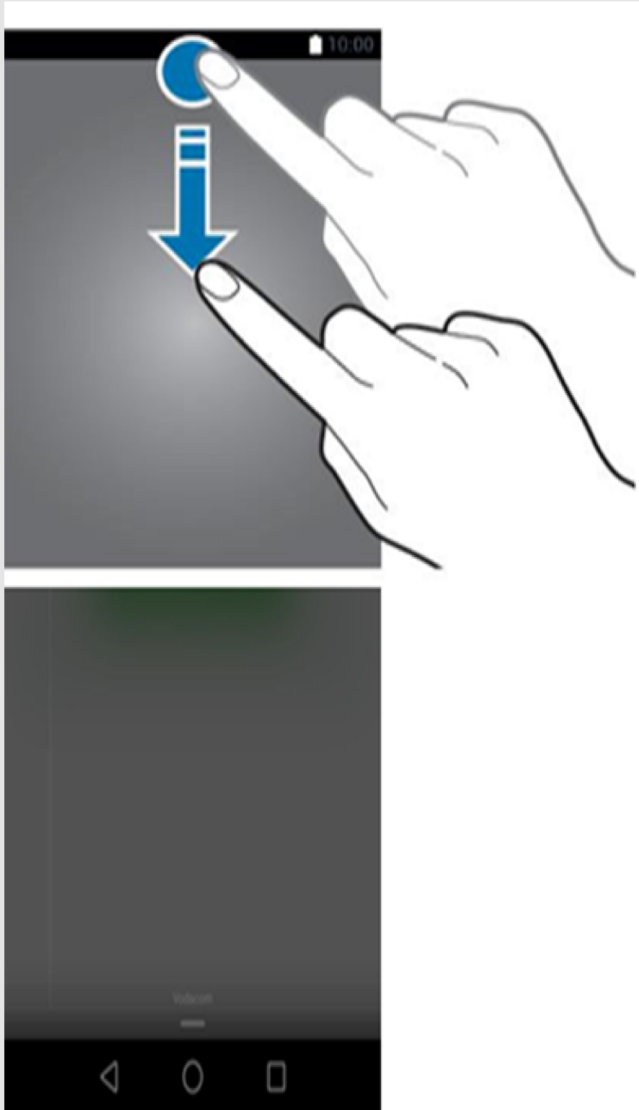

Screenshot 2

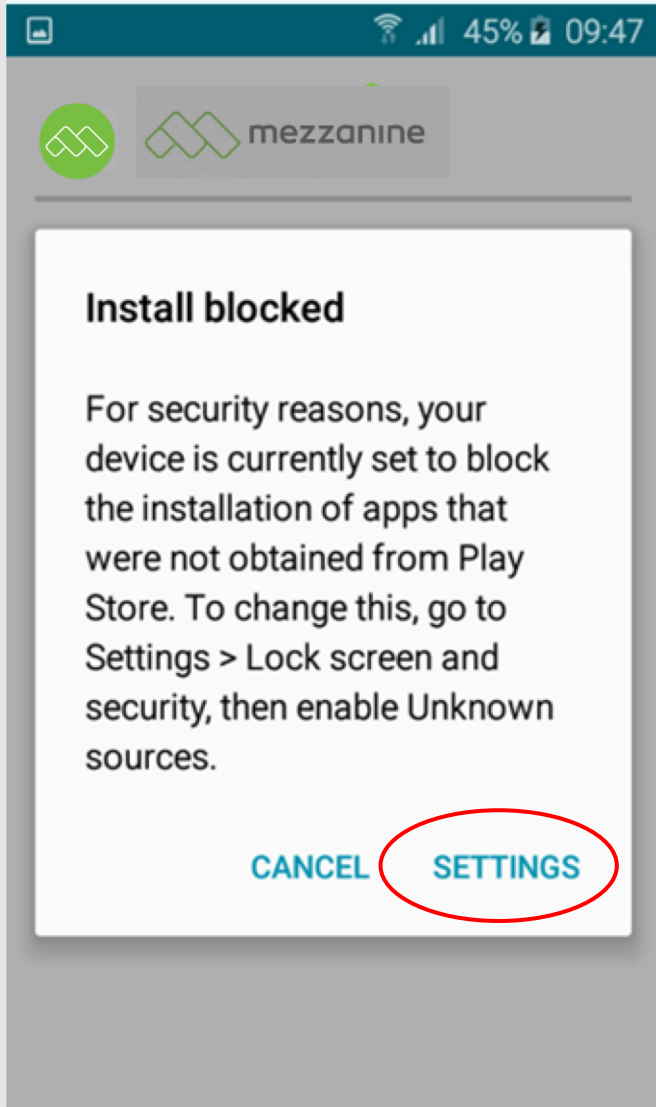

- Press OK when you get the pop up as below:

You will now see the screen as in Picture two.

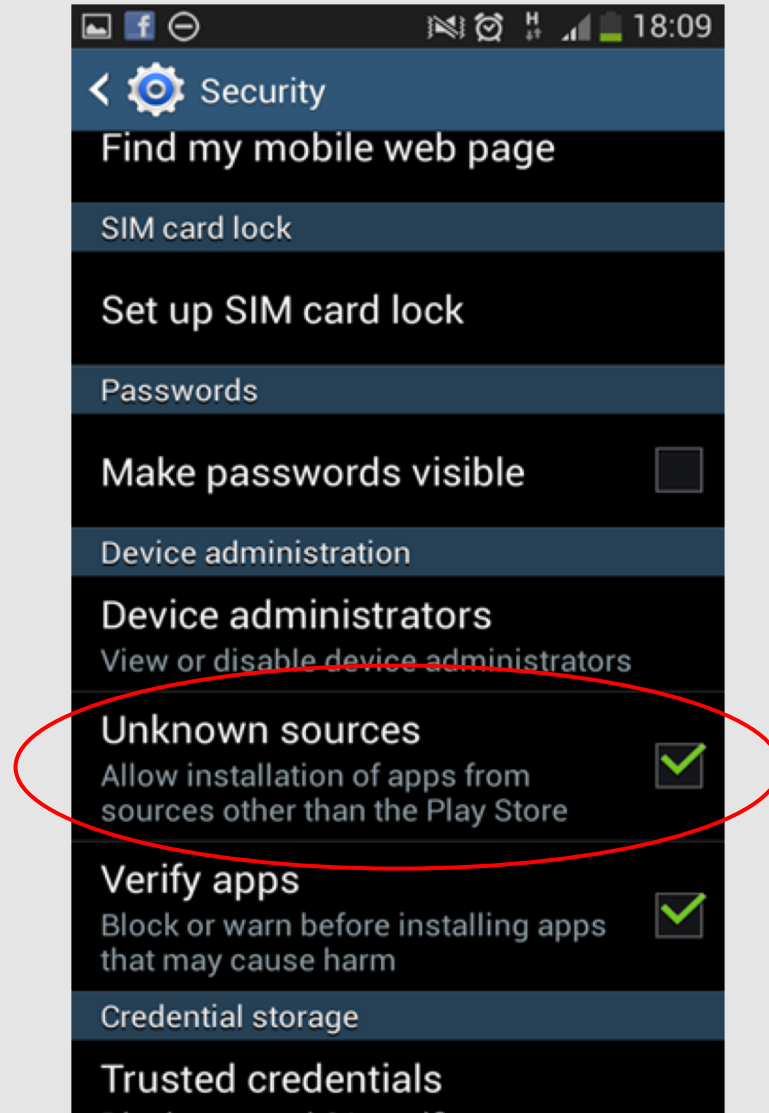

Click on Download Application if your device do not have the application installed yet.

- You may check the progress of your App download by dragging your screen down from top and ensure that the download complete successfully as illustrated on the left.

Screenshot 1

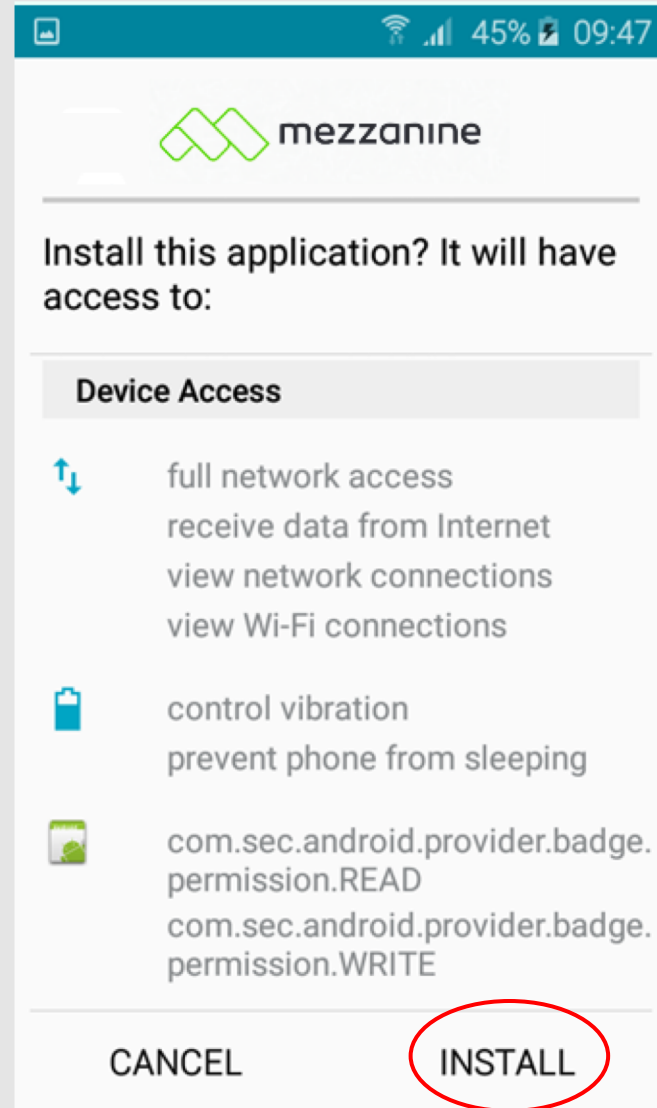

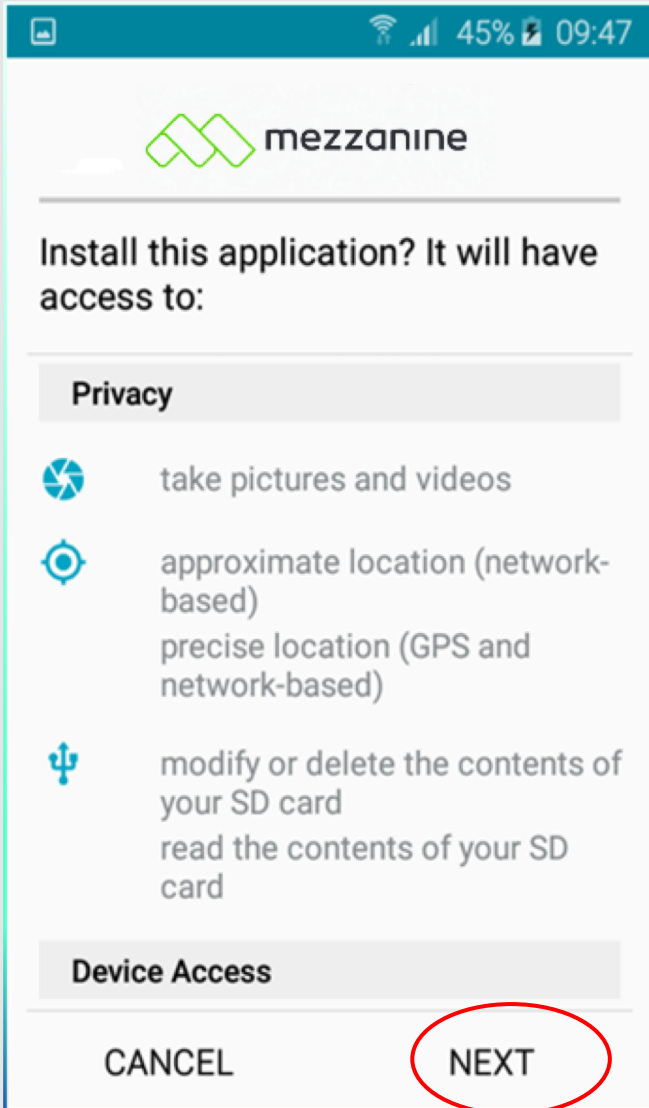

Screenshot 2

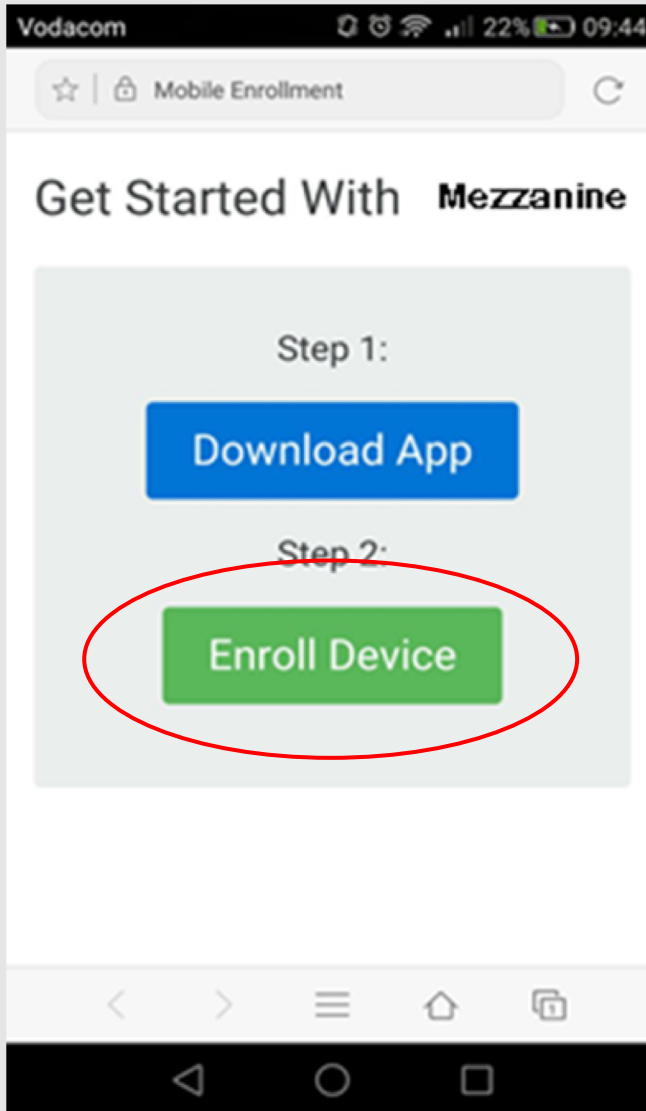

- You might receive a warning that the installation is blocked because the application does not originate from the PlayStore. (Screenshot1)

- Tap on "Settings"
- Make a tick next to "Unknown Sources" (Screenshot 2)

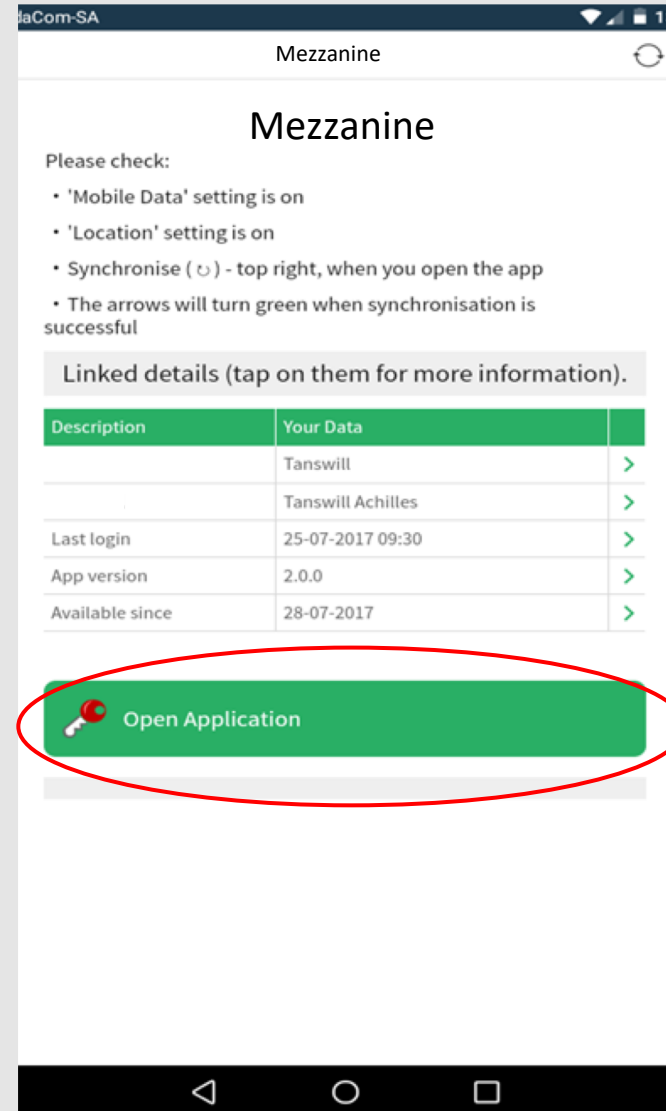

The download and installation will now continue.

- Just keep pressing NEXT until the install option appears in the bottom right-hand corner.
- Then click on the install option.

Screenshot 1

- Once the application has installed, go back to the Internet/Chrome page, click on step 2 "Enroll Device".

- The application will now download the application data (screenshot 1) you have now successfully enrolled the application.

- Your device will now be Enrolled and you will see your Home screen of you Application and may open your application
